

Fight COVID-19 | Steps you can take after exposure

Exposed or Symptomatic:

If you've been exposed or have symptoms, self-isolate, use [Coronavirus Self-Checker](#), and **get tested**.

Confirmed Diagnosis:

Consult with your physician immediately. They can recommend steps you can take to recover at home.

Early Treatment:

Your physician can determine if you qualify for **Monoclonal Antibody treatment**. This treatment is most effective if given as soon as possible.

Hospitalized:

Your physician may recommend **Convalescent Plasma Therapy** and/or **Remdesivir** upon admission. **Dexamethasone** may also be considered as part of your treatment.

Recovered:

14 days after symptoms end, please consider [donating plasma](#) to help others. Donations should begin as early as possible after recovery.

www.thefightisinus.org

Long-Term Effects:

If you have lingering symptoms, be sure to consult your physician and/or a [post-COVID care center](#).

Fight It Forward | Steps we can take together

Consider getting a COVID-19 vaccine

Wear a mask

Wash your hands

Practice social distancing

Opt in for exposure notifications; participate in contact tracing

Consider participating in clinical trials
